

Public Health Spring 2021 Course Offerings

COURSES ARRANGED BY DEPARTMENT

SPECIAL NOTE

1. All coursework counted in the Public Health major requires a grade of C or higher.
2. In addition to the coursework below, the Public Health major requires completion of a minor or second major.
3. A 2000-level or above Statistics course is strongly recommended, either as part of or in addition to completion of General Education requirements.
4. No courses may overlap between major, minor, or General Education requirements.

What if the class I want is full?

Your academic advisor cannot get you into a class if it is full. These are your options:

1. Contact the department that houses the course you want to get into.
2. Go to the course the first day of class. Try to speak with the instructor about a possible wait list or getting added to the course. It is up to the instructor if they will assist you with adding the class.
3. Wait for a spot to open up during the drop/add period, which ends Monday, January 11, at 11:59pm
