Master of Public Health

FLORIDA STATE UNIVERSITY
COLLEGE OF SOCIAL SCIENCES & PUBLIC POLICY

MASTER'S
CEPH ACCREDITED
**WHAT IS PUBLIC HEALTH?**

The focus of Public Health is the health of the community!

Public Health professionals help to prevent illness by promoting wellness and improving everything that impacts health—from housing, education, and income to community design, transportation, and our environment.

**Will it be a good fit?**

Our students come from a wide variety of backgrounds—science, social science, working professionals, and undergraduates from around the world. And we welcome the diversity.

**Public Health professionals promote:**

- Access to quality health care
- Improved health behaviors
- Reduction of diseases
- Use of preventive measures
- Environmental health

**Career Opportunities:**

Public Health is a growing field; contact us today for more information and to see how our program will help you achieve your career goals.

- Demography
- Health Management
- Law
- Biology
- Economics
- Sociology
- Policy Analysis
- Public Management
- Epidemiology
- Consulting
- Social Psychology
- Health Care Professions
CURRICULUM
An overall 42 credit hours, to include:

- 33 CORE course
- 9 Elective courses
- 200-hour Internship

For more details about the curriculum, please visit our website: coss.fsu.edu/publichealth

Students can set their own pace from part-time to full-time. With appropriate planning, the program’s requirements may be completed in 3-4 semesters and a summer.

Meet the program specialist to discuss admission and program criteria!

Joint Pathway
Urban & Regional Planning and Public Health

Major improvements in health can result from improving places and the planning processes that shape them, and changing our personal and collective lifestyles, rather than simply investing further in the health (sick) care system.

Total minimum credit hours required for the joint pathway is 66.

Bachelor/MPH Early Start Pathway Program

Current FSU students may take up to 12 hours of graduate level work while completing their bachelor’s degree.

Students must meet minimum eligibility requirements, however, this does not automatically grant admission to the MPH program.

Why Master of Public Health at FSU?

MPH degree graduates will be trained principally as health policy analysts. They will have a rich background in epidemiology, health economics, health behavior, health administration, health policy and policy analysis, and statistical and qualitative analytic skills.

Our program is accredited by the Council on Education for Public Health.
